photoinactivation 297
photoisomerization 137, 476
photomorphogenesis 307
photomovement 114
photooxidation 428
photoprotection 193
photoreduction 1
photosynthesis 152, 291
photosynthetic reaction center 68
photovoltaic effects in hornets 510
phytochrome 551
platinum complex 356
polymerase 461
polymers 11
polysulphone 411
porphyrins 242, 297
prostate tumor MAT-LyLu 323
protein dynamics 440
protein kinase 48
protochlorophyllide 62
pycnogenol 193
pyrimidine dimer 147, 447

reactive oxygen species ..... 127,152,470"/P>
retinal pigment epithelium 127, 470
Rhodobacter sphaeroides 68
rhodopsin 476

shinorine 515
singlet oxygen ..... 227,319,371,428"
solar exposure 40
solar simulated radiation 265
Southern Hemisphere 411
squaraine dye 99
sunscreens 531

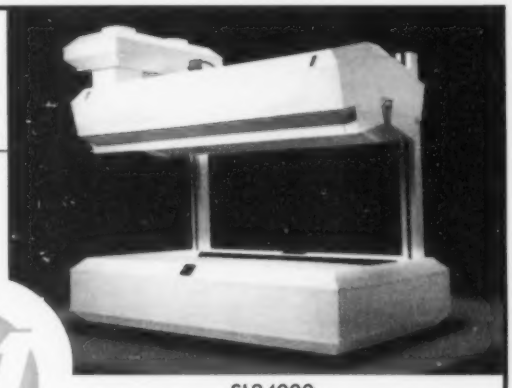
superoxide radical anion 428
Synechocystis 6803 551

T cell 434
thiouredopurenetrisulfonate 494
tumor caracterization 453

ultraviolet index 32
UV exposure, field measurements 26, 32, 199, 219, 307, 379, 382, 399, 404, 416

verteporfin 323
vitamin B2 428

High-Intensity UVA-1 Phototherapy



SL3000

UVA-1

SL24000

As the global leader in innovating and advancing phototherapy equipment, Daavlin exclusively brings the technology of UVA-1 to the U.S. Two cutting edge systems are available, the SL24000 Half-Body Exposure Unit and the SL3000 Localized Exposure Unit. ***Patient insurance reimbursement is available for high intensity UVA-1 340-440 nm.*** Add your facility to the growing list of providers of this sought after technology. Contact Daavlin for complete technical data and reference material.

Daavlin
